Summary

I'm Oscar Carballo - a Backend Developer specializing in scalable solutions with Django REST Framework. I have hands-on experience building robust data pipelines using FastAPI, Flask and Airflow, and working with protocols and libraries such as MQTT, ZeroMQ, Kafka and Pandas.

Currently pursuing a Data Science degree at UOC, I'm steering my career toward Big Data and systems engineering. I'm driven by the challenge of bridging data processing with low-level optimization - building software that is efficient, reliable and easy to work with. Beyond my core stack, I actively explore Go, Rust, and IoT, and I'm passionate about automating both my workflows and everyday processes.

Experience

Sixtema	05/2023-06/2025
05/2023-06/2025	
Web developer intern	05/2023-08/2023
I did web pages with CakePHP	
Data developer	08/2023-06/2025
Built end-to-end data pipelines processing GB-scale datasets for dairy industry and cybersecurity clients. Integrating with ZeroMQ, Kafka and external APIs using FastAPI and Flask as output layers	
Nazaries Intelligenia	06/2025 - actual
Backend developer	
Designed and delivered full Django REST APIs for public-sector clients, from architecture to production support.	

Certifications

PCPP1 - Certified Professional in Python	09/2025	AWS Certified Developer - Associate	02/2025
Python Institute		AWS	

Education

Liceo La Paz	Informatic Microsystems and networks • Intermediate Technical Degree
09/2021 - 07/2023	
IES San Clemente	Web development • Higher Technical Degree
09/2023 - 12/2025	
UOC	Applied Data Science • Degree
02/2026-actual	

Skills

Python	SQL	Apache Airflow	Docker	Fast learning	Proactive
